Introduction

by Ming, ed. Keira

Hello esteemed instructors and fellow students!

Welcome to the very first Record of Mathematics at MathIly-Er 2023! Throughout the first week of our exceptional program, students have delved into the captivating realm of numbers, geometry, algebra, and questionable films about cubes and broccoli. These experiences have ignited their passion for mathematical exploration and development. From sharpening problem-solving skills to helping Corrine’s cats and Alice’s hamsters, the students have made remarkable achievements and progress with the help from our instructors in a remarkably short amount of time. This record is a testament to their experiences, enthusiasm, and hard work this week. Prepare for exciting, possibly life-changing records of proofs and activities regarding fire hydrants and couches, as well as numbirds and the mysterious Evan Madeo. Due to explicit content regarding two turtles on the Eastern University campus, this record is not recommended for children. Reader discretion advised.

Join us as we embark on journeys through the vast landscape of mathematical discovery while carefully avoiding the Triangles of Doom!

First, read the first column on page x. We define the first column as the column on the left side of the page if you are facing the page. Then, read the second column on page x. The second column is defined as the column to the right of the leftmost column. Then, repeat for page x+1, page x + 2, and so on. This is a pretty fool-proof method, but this may be difficult for non-experienced readers. So, we have a distinct method for non-readers. Start by the left-most word in the page and analyze it. You will soon notice that the word seems to make slight sense, meaning that you are on the right track. Then, continue to the next word. As you see, this word makes sense too when connected with the previous word. Following this sequence, you will reach the end of a sentence, for which you may look to the row below and repeat. After reaching the last sentence of page n, you go on to the next page, page n + 1. When you reach the final page, you stop reading. If you are still able to continue reading, please call 1 - 800 - GUINNESS - WORLD - RECORDS for more information regarding your reward. Congrats!
